

Basic Engineering and Front End Engineering Design

Unique Competence – Unique Solutions

Capacity from 500 to 50 000 mhrs

Our Competence

Basic Engineering Design (BED) and Front End Engineering and Design (FEED)

BED and FEED, is an engineering design approach used to control project expenses and thoroughly plan a project before a project sanctioning. As a dedicated supplier of engineering services during the last two decades, NLI Engineering also provides BE/FEED services to the following industries

- Oil and gas upstream processes
- Petrochemical industry
- Process industry
- Infra structure

If your company is planning investments in a new plant, a plant upgrade, a plant extensions and/or a capacity increase NLI Engineering are able to provide valuable services to support your evaluation of capital expenditures.

NLI Engineering's experienced staff possesses valued competence within multi discipline engineering, project management, document management, material requisitions and procurement.

About NLI

NLI is a group of companies supplying engineering and fabrication services, technology products and process solutions to the offshore oil and gas industry. We undertake the complete responsibility from concept development to manufactured product.

Our mission is to make life easy for our customers. To fulfill this goal we focus on competence development, high quality, flexibility and punctuality. NLI has today approximately 250 highly qualified employees.
