**Unique Competence –  
Unique Solutions**

DocIS (Document Information System)

## About NLI

NLI is a group of companies supplying engineering and fabrication services, technology products and process solutions to the offshore oil and gas industry. We undertake the complete responsibility from concept development to manufactured product.

Our mission is to make life easy for our customers. To fulfill this goal we focus on competence development, high quality, flexibility and punctuality. NLI has today approximately 250 highly qualified employees.

## Contact Information

## Our Competence

NLI has long experience handling documentation in both large and smaller projects. We handle all sorts of EPC contracts, FEED and Basic Engineering studies.

**DocIS (Document Information System)** is NLI's own system – developed to satisfy the requirements of our clients. The documentation flow can often be complex – and NLI has proven to have full control of documentation in their projects. Today we have approximately 70 licensed users of the DocIS software.

The Document Control department in NLI also handle other document handling platforms in cooperation with our clients:

- eRoom
- Sharepoint
- ProArc
- Xnotes
- Projectplace

NLI can offer document control services for all sorts of projects – independent of number of sub-contractors and interfacing parties.

DocIS gives the project manager, project members and management full control of: MDL, SMLDL, transmittals, documents and drawings including status, revision, version and progress, through the complete process from planning, engineering, production, as-built and final documentation.

Final Documentation is always a part of the delivery
